SunGuard SNX 60+ glass is ideal for a wide range of design visions. Its consistent color with minimal green creates a polished look and performs beautifully in both flat and bent glass applications.

Ultra-clear, patterned solar PV glass solutions engineered to help maximize light transmission while minimizing absorption and reflectivity - characteristics which contribute to improving overall ...

SNX 70 Plus is a high-performance, triple-silver solar control glass offering an ideal balance of natural light and solar energy control.

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a future where ...

Solarban® R100 glass is a neutral-reflective low-e glass with an excellent solar heat gain coefficient (SHGC). Solarban® R100 glass provides significant improvements in solar performance compared to ...

• Supply glass to many customers in the world, including Trina Solar, JA Solar, Warree, etc; 5; 18 million square meters of glass for module ...

Crafted with heat-treated safety glass, our photovoltaic glass provides the same thermal and sound insulation as traditional options, flooding spaces with natural light. Perfect for facades, curtain walls, ...

Customized ITO / FTO conductive glass plays a crucial role in scientific experiments, offering excellent conductivity, transparency, and stability. Ideal for photovoltaics, sensors, and analytical instruments.

Greatcell Solar Materials supplies a range of transparent conductive glass plates with varying sheet size, sheet thickness and sheet resistance. The conducting layer consists of Fluorine doped Tin Oxide (FTO).

In hot conditions or for building with high internal loads, solar control glass is used to minimize solar heat

300300 solar glass

gain. It allows sunlight to pass through a window while radiating and reflecting away a large amount ...
