What if my car is not capable of a 350 kW charge?

If your car is not capable of a 350 kW maximum charge, the charger automatically supplies the highest power level your vehicle can handle. Check your vehicle's manufacturer manual to learn your car's capacity. At Electrify America stations, you may notice the word "Balanced" on a charger's labels or screen.

Where can I find a charging station?

ChargeFinder will eventually also be available as apps in Apple CarPlay, Android Auto and Android Automotive. Specific city pages provide a good overview of charging stations in a particular city. For larger cities like Los Angeles, New York, San Francisco and Seattle you can find more information about charging stations.

Is price information available for all charging stations?

Price information is available for several charging networks and is updated regularly. In some countries, price information is already available for most charging stations, while in other countries we are working on adding prices for more networks.

Can Tesla cars charge at superchargers?

So far, only Tesla's cars can charge at Superchargers. Filters on the map make it easier to find the right one. Filter on charging speed, free charger, show or hide Tesla chargers and more. Soon there will also be the opportunity to filter on different network or to show what fits a particular car model.
