How many batteries will Portugal have in 2026?

As storage proliferates, the probability of demand curtailment events drops sharply, easing concerns for remote workers who rely on uninterrupted connectivity. If everything on the books is built, Portugal will operate roughly 750 MW of batteries by early 2026, rising toward 2 GW by 2030.

What is a Casal da Cortiça battery?

On the standalone side, the Casal da Cortiça facility in Leiria, developed by Infraventus Energy Storage is Portugal's first fully merchant large-scale battery using lithium technology with a power output of 12 MVA and a charging capacity of 24 MWh. Commissioned in June 2025, it trades energy on the spot and ancillary system services.

How many hybrid storage projects are being deployed in Portugal?

Additional hybrid capacity is being deployed, namely by Iberdrola, Greenvolt, Akuo, EDP and GALP, supported by Portugal's Recovery and Resilience Plan (PRR) programme under the "Flexibility and Storage" incentive call. Under this PRR scheme, 41 projects were approved, totalling around 500 MW of new storage capacity and EUR 99.75 million in grants.

How much power will Portugal have by 2026?

If everything on the books is built, Portugal will operate roughly 750 MW of batteries by early 2026, rising toward 2 GW by 2030. The government plans to double its hydrogen-electrolyser ambition to 5.5 GW, creating another sink for surplus renewable power.
