What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

Who is solarcont GmbH?

SolarCont GmbH was created through a cooperation between the two successful companies Hilber Solar GmbH from beautiful Tyrol and the company Gföllner Fahrzeugbau und Containertechnik GmbH, which is deeply rooted in Upper Austria. This cooperation makes it possible to develop a completely new type of mobile solar system.

This setup lets you bring solar power anywhere you need it. You can use a solar energy container at faraway work sites, outdoor events, or for mobile businesses.

Discover our global leading mobile solar container factory delivering high-efficiency, durable portable solar solutions ideal for off-grid power, disaster relief, and remote sites.

To meet specific project requirements, solar power containers can be customized at both the system and structural levels. Configuration options may include variations in energy storage capacity, ...

As Southeast Asia accelerates its shift toward renewable energy, photovoltaic power station containers are emerging as game-changers. This article explores how these modular systems address regional ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no ...

ASEAN multifunctional solar container outdoor power customization

Our business covers industrial manufacturing and energy storage solutions and provides comprehensive services from system design to installation and commissioning of containerized solar power systems.

Our solar containers reduce installation time from months to just days, minimizing labor costs and project delays. Built to withstand extreme temperatures (-40°C to +70°C), sandstorms, humidity, and ...

At SolaraBox, we design and manufacture advanced solar containers that bring clean, reliable, and mobile energy wherever it's needed. Built for multi-industry use, our systems replace ...

Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by ...

It can quickly build a solar photovoltaic power generation system, integrating multiple key components such as solar cell components, inverters, battery packs, monitoring systems, etc., forming an ...
