BrightSource Energy, Inc., headquartered in Oakland, California, is a global leader in the design, development, financing, construction, and operation of utility-scale solar power ...

BrightSource Energy's technology is based on concentrating solar power (CSP), which uses mirrors to focus sunlight onto a central receiver, where it is converted into heat. The heat is then used to ...

BrightSource Energy, Inc. is an Oakland, California based corporation that designs, builds, finances, and operates utility-scale solar power plants. Greentech Media ranked BrightSource as one of the top 10 ...

BrightSource combines breakthrough technology with world-class solar power plant design capabilities to generate clean energy reliably and responsibly. BrightSource's LPT solar thermal system is ...

BrightSource Energy is a leader in the design and development of concentrating solar thermal technology used to produce high-value electricity and steam for power, petroleum and process ...

Combining breakthrough technology with world-class solar thermal plant design capabilities, BrightSource generates clean energy, reliably and responsibly, while minimizing impact ...

BrightSource Energy announced yesterday the launch of SolarPLUS, a combination of its solar tower technology and a way to store the power it generates using molten salts. Storage of solar ...

The fourth generation of BrightSource's solar field technologies features improvements to the heliostats, solar field communications network and solar field control system. These technologies ...

BrightSource Energy designs, develops and deploys concentrating solar thermal technology to produce high-value electricity and steam for power, petroleum and industrial-process markets worldwide.

American BrightSource Solar Power Generation Technology

BrightSource's solar thermal energy systems generate power the same way as traditional power plants by creating high temperature steam to turn a turbine. However, instead of using fossil fuels or nuclear ...
