How do you connect a battery cabinet to a power system?

Connect the power system's battery cable terminated in an Anderson connector to the first battery cabinet's battery cable terminated in a mating Anderson connector. Connect the second battery cabinet's battery cable terminated in an Anderson connector to the fixed mating Anderson connector located on the first battery cabinet.

What is a battery cabinet?

The battery cabinet contains one (1) 40 A battery disconnect circuit breaker and provides alarm leads attached to the common contacts of the breaker. Battery cabinets may be daisy chained as shown in Figure 7 to increase the reserve time.

Why should you have a battery cabinet?

For example, dropping a battery or leaving it in a hot location can result in irreversible damage to the battery cell, which can lead to ignition or explosion. Providing a battery cabinet can reduce these risks by encouraging safe handling and storing practices within your team.

How do I remove the battery tray from the battery cabinet?

Remove the front cover from the battery cabinet by loosening the top two captive fasteners and lifting the cover up and out of the battery cabinet. Slide the battery tray out of the battery cabinet until it stops. Place the batteries inside the battery tray oriented as shown in Figure 8. Place the provided spacers between the batteries.
