Hydroneo East Africa's call for tenders for the Mpanda hydroelectric power station in Burundi marks a significant step, with plans to supply 10% of the country's electricity through a public-private ...

The Jiji power plant is part of a large energy project supported by a consortium of donors, including the World Bank, the African Development Bank, and the European Union.

The new project, with a combined generation capacity of 49.5 megawatts, involves two plants - Jiji and Mulembwe - developed on two small rivers in southern Burundi.

The project concerns the development of two hydropower plants and the construction of infrastructure required for electric power transmission and distribution. These two development ...

As the Jiji and soon-to-be-completed Mulembwe plants begin to deliver their full capacity, they promise to illuminate thousands of homes, power countless businesses, and drive industrial ...

Located in Bururi province, this large-scale infrastructure marks a key step forward in the country's pursuit of energy self-sufficiency. It is also a strong signal for an investment-friendly climate ...

President of Burundi, Évariste Ndayishimiye, has officially inaugurated the Jiji hydroelectric power station, located in the southern province of Bururi. It forms a component of the US\$320mn Jiji ...

The project concerns the development of two hydropower ...

The deal represents Burundi's largest long-term project financing and will play a vital role in a country where only 12% of the population has access to electricity.

Burundi has inaugurated the Jiji hydroelectric power plant, a \$320 million renewable energy project that

Burundi Power Plant Energy Storage Project

strengthens its energy independence and unlocks widespread economic and investment potential.

The Jiji and Mulembwe Hydropower Project aligns with Burundi's strategic commitment to expand its renewable energy capacity and reduce reliance on imported fossil fuels.
