LANSING, Michigan -- The Michigan Department of Environment, Great Lakes, and Energy (EGLE) has announced the seventh round of Renewables Ready Communities Awards (RRCA) to support nine ...

The program aims to accelerate the build-out of large-scale renewable energy projects such as wind, solar, and storage by providing these incentives for communities that permit and host the projects.

Located in central Michigan's Branch County, the 150-megawatt solar park has nearly 347,000 solar panels and generates enough clean energy to power approximately 40,000 homes.

Our projects create jobs, provide economic benefits to local communities and help protect the environment for future generations. Download a map of our renewable energy projects.

Today's announcements follow the program's first awards in October 2024, totaling \$3.5 million to nine communities, supporting enough solar energy to power 700,000 homes and businesses.

Dalong Power Plant profile includes core details such as plant name, technology, capacity, status, plant proponents (owners, developers etc.), owner stakes etc as well as key operational data including ...

Below is a chart comparing solar generation potential based on roof size, assuming all of the same metrics as before: 320-watt solar panels, 17.5 square foot panels, and using every inch of roof space ...

Solar energy development is rapidly growing in Michigan as technology and price continue to become more accessible. For both small-scale and utility-scale projects, the resources below can help ...

Mason Township in Arenac County will get \$120,035 for the Au Gres Solar project. Construction on the 55-megawatt solar farm is scheduled to begin in July and begin operations in ...

Dalong Township Solar Power Generation

The new solar power plant in Datong will replace burning 1 million tons of coal in the next 25 years as China flexes its ability to make rapid improvements in its energy system.
