Our containerized ESS products include not only state-of-the-art battery energy storage systems but also expert engineering services to support every phase of your project lifecycle.

With global energy storage capacity projected to grow 15-fold by 2040 according to BloombergNEF, EPC (Engineering, Procurement, Construction) has become the backbone of this ...

Discover how modern engineering approaches and smart project management are transforming energy storage power station EPC projects worldwide. This guide explores technical insights, cost ...

The 5MWh 20 Liquid-Cooled Energy Storage DC Cabin is a high-performance energy storage solution designed for large-scale applications, including renewable energy integration, peak shaving, and ...

Electrochemical energy storage compartment fire technology program to electrochemical energy storage compartment fire extinguishing system as the main, "early detection, early disposal" as the principle, ...

Led by industry veterans, our Engineering, Procurement, and Construction (EPC) expertise are exclusively dedicated to Solar and Battery Storage energy infrastructure projects. Our accomplished ...

Battery Energy Storage Systems (BESS) are emerging as a critical component of modern data center infrastructure. By providing service to your operation's power grid, as well as secondary backup ...

A BESS cabinet (Battery Energy Storage System cabinet) is no longer just a "battery box." In modern commercial and industrial (C& I) projects, it is a full energy asset --designed to reduce electricity ...

Perfect for residential backup power, renewable energy storage, small commercial operations, and remote installations. This system's compact size ensures ease of shipping and installation. As a plug ...
