Connecting to the Evoenergy electricity distribution network, the Williamsdale BESS is part of the ACT Government's Big Canberra Battery project. It will have the capacity to store enough renewable ...

The large-scale battery storage system will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. Enough energy to power one-third of Canberra for two ...

Scheduled to begin operations in 2026, the BESS will store enough renewable energy to power one-third of Canberra for two hours during peak demand, playing a pivotal role in achieving ...

From powering EVs to stabilizing solar grids, Canberra's lithium battery factories combine environmental responsibility with technical excellence. As energy storage needs grow exponentially, this regional ...

The Big Canberra Battery will help deliver clean, reliable power and create jobs for the community. The Big Canberra Battery is on track to be operational in 2026.

The Australian Capital Territory Government and global energy storage firm Eku Energy have begun construction on the Williamsdale Battery Energy Storage System

Energy storage developer Eku Energy has started constructing a 250MW/500MWh battery energy storage system (BESS) in Canberra, the Australian Capital Territory (ACT). A ...

The Big Canberra Battery will play a crucial role in managing peak electricity use demand and in supporting the ACT's transition to a more sustainable energy future.

The way has been cleared for construction to begin on a 250 MW / 500 MWh battery energy storage system that will help "future proof" the Australian Capital Territory's energy supply by ...

Energy storage system factory in Canberra

This 250-megawatt (MW), 500 megawatt-hour (MWh) battery energy storage system (BESS) is part of the Big Canberra Battery project and can store enough renewable energy to power ...
