How can the western area Power Administration support energy storage project financing?

The Western Area Power Administration is a good example of how one of these groups can support energy storage project financing of large projects. Through an infrastructure financing program aimed at expanding and modernizing the electric grid, WAPA's Transmission Infrastructure Program (TIP) can make loans to project.

Are energy storage projects different than power industry project finance?

Most groups involved with project development usually agree that energy storage projects are not necessarily different than a typical power industry project finance transaction, especially with regards to risk allocation.

What are energy storage needs in the power sector?

For many decades, energy storage needs in the power sector primarily revolved around the use of pumped hydro systems at the utility scale level, and lead acid batteries for either UPS systems at power facilities and substations or supporting off-grid applications.

Are energy storage projects a project finance transaction?

In many ways, energy storage projects are no different than a typical project finance transaction. Project finance is an exercise in risk allocation. Financings will not close until all risks have been catalogued and covered. However, there are some unique features to energy storage with which investors and lenders will have to become familiar.
