What is an IP66 electrical enclosure?

IP66 electrical enclosures are equivalent to NEMA 4 and NEMA 4X enclosures. International Protection(IP) standards are used to designate the protective capacity of an electrical enclosure. The two-digit code shows the protection against particles (the first digit) and water (the second digit).

What are the features of IP66 cabinets?

Features of our IP66 cabinets include: - Complete protection from solid objects of any kind. - High pressure jets from all directions,(limited ingress permitted). - Enclosure can be hosed down, eg. Ship decks. Often called rain tight enclosures due to their excellent weather resistance.

Are IP66 enclosures good?

IP66 enclosures are as versatile as they are tough, and they're rated for either indoor or outdoor use, making them a go-to choice for commercial and industrial enclosures of all kinds. See our IP66 enclosure guide for more about this rating, or read our IP rating guide to learn more about the IP system.

What are IP66 rated boxes?

Meeting IP66 ratings ensures components and devices stay protected in dusty, dirty and wet environments. IP66 rated boxes are designed for use in a wide range of industries such as oil and gas, alternative energy, marine, telecommunications and more. Polycase IP Ratings are based on the NEMA 250 to IEC 60529 conversion table published by NEMA.org.
