OverviewHistorySolar potentialInstallations by regionInstallations by applicationConcentrated solar powerHybrid solar plantsSolar heatingSolar power in India is an essential source of renewable energy and electricity generation in India. Since the mid-2010s, India has increased its solar power significantly with the help of various government initiatives and rapid awareness about the importance of renewable energy and sustainability in the society. In order to decrease carbon dioxide emissions, reduce reliance on fossil fuels, with coal being th...

India is a country that occupies the greater part of South Asia. It is a constitutional republic that represents a highly diverse population consisting of thousands of ethnic groups. It ...

Physical Achievements Programme/Scheme wise Cumulative Physical Progress as on 31th December, 2025 ...
Solar Power* (Cumulative) : 135.81 GW Ground Mounted Solar Plant : ...

India is spearheading a solar energy revolution, aiming for 500 GW of non-fossil fuel energy capacity by 2030. The country has rapidly expanded its solar sector, surpassing 100 GW in ...

India's solar installed capacity chronicles an outstanding evolution in renewable energy progress. As of 31 January 2025, the installed capacity reached 100.33 GW, surpassing previous milestones and ...

India, the world's largest democracy, has a very diverse population, geography, and climate. India is the world's second most populous country, as well as the seventh largest in area.

Complete solar energy in India 2025 guide with cost, benefits, installation process, and government subsidies. Solar panels, renewable energy, and green power.

India is one of the oldest civilizations in the world with a kaleidoscopic variety and rich cultural heritage. It has achieved all-round socio-economic progress since Independence.

India installs solar panels

India's cumulative installed solar capacity stood at 116.4 GW as of June 2025, and the trajectory over the next five years points to a significant ramp-up.

By the end of 2025, India's solar power installed capacity reached 135.81 GW AC. [1] India is one of the world's fastest adopters of solar power, making it the third-largest producer of solar power globally as ...

By the end of fiscal 2025, India's total renewable energy capacity reached 220 GW, according to MNRE data. Solar energy comprised 48% of this total, making it the largest contributor, ...

India's solar sector has achieved a monumental milestone, installing a record-breaking 29.5 GW of new solar capacity in the first nine months of 2025.
