We are pleased to announce the tutorial and keynote speakers. Please click the links below to download. The top-level schedule for the conference is shown below.

Our goal for the Shenzhen-Macao 2025 Symposium on Microgrids is to continue our exchange of results from microgrid research, demonstration, and deployment worldwide with an emphasis on recent ...

**CALL FOR PAPERS** work in progress within the rapidly growing fields of DC microgrids. It will bring together researchers, engineers, and students from academia, government, and industry to have an ...

As utility microgrids integrate more renewable energy generation, it is important to assess how inverter-based resources (IBRs) contribute to microgrid stability and resilience.

This conference brings together researchers, engineers, and students from academia, government and industry for an interactive discussion on the latest advances in DC grid technologies ...

Microgrid Engineering Conferences 2026 2027 2028 is for the researchers, scientists, scholars, engineers, academic, scientific and university practitioners to present research activities that might ...

The case studies presented demonstrate the effectiveness of the proposed microgrid dispatch scheme. Two-level dispatch was compared with the standard economic dispatch and showed increased ...

Held during June 12-14, 2026 in Xi'an, China, the conference aims to bring together leading researchers, engineers, and industry professionals to discuss the latest advancements and challenges in the ...

Registration is now open for the Sixth IEEE International Conference on DC Microgrids (ICDCM) to take place August 5-8, 2024, at the Columbia Metropolitan Convention Center, ...

# International Conference on Microgrid Dispatch

The ICDCM is a flagship conference of the IEEE Power Electronics Society (PELS) devoted to the dissemination of new ideas, research and work in progress within the rapidly growing ...
