U.S. energy officials are quietly exploring a potentially major national security threat: unrecorded communication devices built into Chinese-made inverters and batteries that supply ...

Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a "critical role" in renewable energy infrastructure, Reuters reports. This has ...

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people familiar with ...

Power inverters, which are predominantly produced in China, are used throughout the world to connect solar panels and wind turbines to electricity grids.

Experts uncover rogue devices in Chinese-made inverters and batteries, prompting U.S. and EU nations to review renewable tech security.

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented ...

European grid operators and cybersecurity agencies have flagged Chinese-made inverters as a potential weak point in the continent's rapidly expanding solar fleet, especially where undocumented ...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

This follows discovery of rogue communication devices not listed in product documents in some Chinese

Inverter hidden power

solar inverters, according to Reuters. The devices were reportedly found over a ...
