What is the difference between Greek and Latin?

Latin, on the other hand, uses the Latin alphabet, which is the basis for many modern alphabets, including English. It consists of 23 letters and does not have distinct forms for different positions within a word. When it comes to pronunciation, Greek and Latin differ significantly. Greek has a more complex phonetic system compared to Latin.

Is Latin a Greek language?

Latin is a member of the broad family of Italic languages. Its alphabet, the Latin alphabet, emerged from the Old Italic alphabets, which in turn were derived from the Etruscan, Greek and Phoenician scripts.

Did Greek come from Latin?

The answer is pretty simple: Greek did not come from Latin. Some form of Greek or Proto-Greek has been spoken in the Balkans as far back as 5,000 years. The oldest ancestor of the Latin language, which was an Italic language goes back some 3,000 years. In other words: Greek is older than Latin, so there's no way that Greek could come from Latin.
