Serbia installed a record 134.3 MW of solar power in 2025, nearly doubling the previous year's additions and signaling a clean energy transformation gaining real momentum. Thousands of ...

Serbia's renewable energy landscape is set to expand with several solar power plants currently in development. The most significant is an 80 MW facility in Prokuplje, which is slated for ...

The capacities of solar and wind power plants in Serbia increased in one year by 40%, from 647 MW in August last year to 908 MW; Montenegro will have 187 MW of installed renewable energy capacity ...

Serbia had a record year for solar additions in 2025, led by deployment of large-scale plants. The country has a gigawatt-size project pipeline, although most remain in the earlier stages of...

Serbia is yet to inaugurate a solar power plant greater than 10 MW in capacity but a number of large-scale projects were agreed upon last year, including plans to develop 1 GW of solar across six sites ...

The solar and wind fleet in Serbia is expected to expand by 138 MW in 2025, with 76 MW in wind farms and 62 MW in solar power plants, according to the country's energy balance for 2025.

Onshore wind capacity increased by 36% to 824 MW, while solar capacity surged 80% to nearly 320 MW last year, the group's manager Danijela Isailovic told the Sarajevo Energy Forum in ...

Serbia plans to start the construction of 1 GW of photovoltaic power plants with battery storage systems this year, state-owned energy producer Elektroprivreda Srbije (EPS) quoted energy ...

The figure is a record for a calendar year in Serbia, building on the 80 MW added in 2024, and takes the country's cumulative solar capacity to 318.3 MW. Danijela Isailovic, RES Serbia ...

Serbia's project to build 1 GW of new solar capacity, coupled with storage, is expected to enter the

Is solar power in Serbia

construction phase in 2026, the country's minister of mining and energy said today, noting ...
