Power Kyiv Project is developing a state-of-the-art, 600 MW natural-gas fired power generation facility that will provide the city of Kyiv with flexible and reliable power generation.

The Kremlin's forces have been striking Ukraine's energy generation and distribution facilities almost daily. Attacks on November 25 alone left more than 40,000 people without power in ...

Given Ukraine's high average wind speed, significant solar energy potential, and increasing volume of agricultural waste, the country's renewable energy sector has substantial growth potential.

Supported by a resilient grid, it can provide not only not only short-term energy security in the face of relentless Russian attacks but also lay the foundations for a long-term, robust energy ...

Sustainable energy solutions take precedence in discussions, with a strong emphasis on initiatives related to renewable energy sources. Solar and wind energy projects are prominently featured, with ...

Against a backdrop of war and instability, Ukraine's progress in renewable energy stands out. This isn't just following a global trend - it's a lifeline for the nation's future.

A new law that will significantly improve the grid connection of renewables was approved by the Ukraine's parliament, the Verkhovna Rada, on January 14, 2025.

Several waves of explosions were heard across the capital, according to Kyiv Independent reporters on the ground, as well as in Kyiv Oblast, where power outages were reported ...

As Ukraine looks to rebuild its energy sector following a recent acceleration in attacks by Russia, pursuing a more decentralised electricity system would help ensure reliable access to power, ...

First, the plan's energy agenda calls for Ukraine to aggressively diversify its energy mix, moving away from

Kiev renewable electricity

nuclear power toward renewables such as wind, solar, and biomass.
