Do landlords pay for solar panels?

From the landlords' perspective, they see the installation of solar panels as similar to any other capital improvement to the rental property. Just as landlords would pay for a new roof or a furnace, they see themselves as responsible for the solar panel system's costs.

Can You charge tenants for solar power?

You can charge tenants for solar power produced by the solar panels on a rental property. This can be done by integrating the solar energy generated into the tenants' utility bills or through a separate line item charge.

Can a landlord pass on solar panels to tenants?

Additionally, the rental agreement or lease should explicitly state if landlords intend to pass on the solar panel costs to tenants. Tenants, for their part, should thoroughly peruse any agreements and ask for clarifications regarding such provisions before entering into a contract.

Should landlords increase rent for solar panels?

For example, in California, where solar power is widely used, some landlords have increased rent to cover the cost of solar panel installation and maintenance. This can be controversial, particularly if the tenant is not seeing savings on their electricity bill.

From the landlords' perspective, they see the installation of solar panels as similar to any other capital improvement to the rental property. Just as landlords would pay for a new roof or a ...
