Elon Musk's rocket and satellite company SpaceX is acquiring his AI startup xAI, the centibillionaire announced on Monday. In a blog post, Musk said the acquisition was warranted ...

Elon Musk is merging his SpaceX rocket company with his artificial intelligence startup xAI. The deal is valued at \$1.25 trillion.

Elon Musk unveils an incredible solar energy plan. Could it replace fossil fuels for good? Explore this groundbreaking vision now!

To counteract this variability, large-scale energy storage systems are essential. While advancements have been made, current technologies are not yet capable of supporting ...

Space-based solar could power AI more efficiently than on Earth, with full-scale deployment possible in two to three years, Elon Musk said last week in Davos, Switzerland. ...

But what exactly makes energy storage systems like Tesla's Powerwall and Megapack so revolutionary? Let's unpack Musk's blueprint for transforming how we store and distribute electricity.

Elon Musk just became the first person ever worth \$800 billion or more after his rocket maker SpaceX acquired his artificial intelligence and social media company xAI.

The concept of space photovoltaics is not actually new, but Musk's entry may truly push it towards industrialization. So - called space photovoltaics means converting solar energy into ...

The Tesla Powerwall, a compact and efficient home battery system, enables users to store surplus solar energy generated during the day for later use, even during grid outages.

Elon Musk's vision of a sun-powered future involves harnessing solar energy on a grand scale. This article explores the feasibility of this vision, examining Tesla's contributions, potential ...

Elon Reeve Musk was born on June 28, 1971, in Pretoria, South Africa's administrative capital. [1][2] He is of British and Pennsylvania Dutch ancestry. [3][4] His mother, Maye (née Haldeman), is a model ...

To counteract this variability, large-scale energy storage systems are essential. While advancements have been made, current technologies are not yet capable of supporting such ...
