What are the new photovoltaic industry guidelines?

The revised guidelines encourage photovoltaic companies to focus on technological innovation, product quality improvement, and production cost reduction, rather than merely expanding capacity.

Should solar energy be included in New construction policies?

Governments around the world are increasingly incorporating solar energy requirements into building policies. In 2025, a growing number of jurisdictions mandate or incentivize the inclusion of solar photovoltaic (PV) systems in new construction.

What are China's changes to photovoltaic manufacturing standards?

SUN KAIFANG/FOR CHINA DAILY China's Ministry of Industry and Information Technology has announced revisions to photovoltaic manufacturing industry standards, addressing current challenges like businesses' repetitive expansion of low-level production capacity and falling profitability, to promote the PV industry's healthier development.

Why does China need a stable policy framework for solar PV market development?

The central government has placed significant emphasis on renewable energy, particularly solar PV technology. China's rapidly growing PV industry greatly benefited from the domestic supportive policies. Hence, maintaining stable policy framework and expectations is pivotal for market development.

Under the "430" policy, the new management guidelines state that distributed PV projects filed before the release of these measures and commissioned by May 1, 2025, will continue to follow ...

China's new photovoltaic industry regulation is here, and it's set to send major ripples across the global solar market. On August 19, 2025, a powerhouse of Chinese government ...

China's PV industry has established a preliminary policy system. Industrial policy is lagged compared with the market development. Reducing carbon footprint of PV products is critical for policy ...

Driven by favorable factors such as the continued decline in PV power generation costs and growing demand in emerging markets, global installations of new PV capacity are expected to ...

New policy for installing photovoltaic panels is released

"The new regulations would help accelerate the elimination of outdated capacity and support the industry's long-term healthy development," said Lin Boqiang, head of the China Institute ...

China's photovoltaic sector is currently riding what industry insiders call the "policy rollercoaster". The government's latest moves resemble a carefully choreographed dance between market forces and ...

This article provides a technical yet accessible overview of 10 key policies that require or encourage installing solar panels in new buildings, illustrating how these measures function and their ...

More supportive policies to maximize solar power use and promote healthier photovoltaic development are in the pipeline, with sanguine forecasts of record growth in PV capacity this year, ...

China's Ministry of Industry and Information Technology announced on Wednesday certain revisions to the previous photovoltaic manufacturing industry standards, raising the minimum ...

China's National Energy Administration (NEA) has issued final regulations for distributed solar power, replacing 2013 interim rules with comprehensive standards for project lifecycles.
