----

Amateur radio is many things, including a voluntary noncommercial communication service offered to the public. It was for this communication service that ARRL was created. Following the trunk lines of the ...

The NTS is a field organization of the ARRL (American Radio Relay League) which was formed to pass formal written messages (traffic) from any point in the United States to any other point. The NTS has ...

Channelling the DIY energy of pirate radio while prioritising total musical freedom for show hosts and a desire to cover every genre imaginable across its sprawling, wildly diverse ...

The National Traffic System (NTS) is an organized network of amateur radio operators sponsored by the American Radio Relay League for the purpose of relaying messages throughout the U.S. and Canada. During normal times, these messages are routine greetings ("Happy birthday Aunt Mary") and keep the system well oiled and the operators trained so that everything ...

The following is based on the story of "how" and "why" ARRL"s National Traffic System (NTS) came to be -- an expansion of an article by Phil Sager, WB4FDT, and Bud Hippisley, W2RU, ...

The National Traffic System®, or NTS®, is a network that allows for rapid movement of traffic--or radiograms--from origin to destination. NTS helps to train radio amateurs in relaying ...

The National Traffic System (NTS) is an organized network of amateur radio operators sponsored by the American Radio Relay League for the purpose of relaying messages throughout ...

Service originating station to inform if cannot deliver or if they requested conirmation. Enter reply into NTS system if there is one.
