Solar power became part of the energy mix in 2013, following government policies aimed at supporting renewable energy development. The country now has seven large-scale solar projects that ...

OverviewHistoryGovernment policyProjectsFarmingChallengesPublic receptionAs of 2025, solar power is the largest electricity source in Pakistan, accounting for more than 25% of total production in 2025. In 2024, solar power installations in the country grew at the highest rate in the world, with solar installations providing an estimated one-third of the country's entire generating capacity added during the year. As electricity prices doubled from 2021 to 2024, and Chinese solar panel manufacturers with manufacturing overcapacity cut prices, Pakistanis have taken to installing solar pa...

Solar energy in Pakistan has been gaining traction amid Asia's fast-paced shift towards renewable energy. According to the International Renewable Energy Agency (IRENA), Asia ...

Solar is gaining traction on farms and factories after the government cut electricity subsidies, causing prices to spike. In many places, electric bills cost more than rent, and blackouts ...

Pakistan is in the midst of a solar boom that solar analysts describe as "unprecedented." ISLAMABAD -- Muhammad Zia ur Rahman got the idea to install solar panels on his house after he ...

A complete step-by-step guide to developing a solar power project in Pakistan. Learn about site selection, NEPRA licensing, financing, EPC, and grid connection.

With a staggering 22 GW of solar panels imported in just 18 months, the country is undergoing a massive shift towards decentralized solar solutions. However, sustaining this ...

Listed below are the five largest upcoming Solar PV power plants by capacity in Pakistan, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to ...

Pakistan solar panel project construction

Oslo, 31 January 2024: Scatec ASA, a leader in renewable energy solutions, has finalised construction and started producing clean energy from its 150 MW solar power plants in Sukkur, Pakistan.

Pakistan has become one of the biggest new solar markets. It's bringing cheap, clean power but analysts warn of potential trouble ahead.

Pakistan has witnessed one of the most rapid and unanticipated transitions to clean energy, driven largely by homes and businesses installing rooftop solar panels.
