Photovoltaic panels convert sunlight directly into electricity, ideal for powering lights, appliances, or water features. On the other hand, solar thermal systems can provide hot water for ...

Protect structures from water damage with MEL-DRAIN, a high-performance drainage board for waterproofing and moisture protection. Designed for basements, retaining walls, plaza decks, and ...

It serves to retain a specific volume of water for vegetative systems while also facilitating the drainage of excess water to designated outlets. Additionally, it can act as a protection board over waterproofing ...

Our Extensive 1" Drainage / Retention (DR) Board is designed for extensive vegetated roofs requiring moderate water storage.

Designed specifically for green roof applications, TREMDrain(TM) GS provides an economical solution for drainage, aeration, water storage, soil retention, root barrier, and waterproofing membrane protection ...

The Photovoltaic Stormwater Management Research and Testing (PV-SMaRT) project is developing and disseminating research-based, PV-specific tools and best practices for ...

The ArchiGreen ® SedumDrain ® 25 is a black water reservoir and multi-directional runoff-delay drainage board made of recycled high impact polystyrene (HIPS) for use on intensive, semi-intensive ...

This paper presents the development of a new floating PV system for use in water reservoirs. The innovative floating system is modular in design, comprising interconnected floating modules.

Meta Description: Discover how anti-impact water retaining boards under photovoltaic panel eaves prevent energy loss and structural damage. Learn installation best practices, material innovations, ...

Photovoltaic courtyard water retaining board

SedumDrain ® 25 are outstanding water reservoir and drainage boards on green roofs. SedumDrain ® 25 have been installed on LEED Platinum and BREEAM outstanding award-winning green roofs.
