Drone technology is used to inspect and monitor solar panels in power plants from the air. This method allows for rapid and detailed inspection of large areas, saving time and labor.

These common solar panel defects are hard to see without special equipment but can get worse over time due to weather changes. When they grow larger, they can disrupt the energy ...

HENDERSON, Ky. (WEHT) - The Henderson County Sheriff's Office is investigating after receiving a report from Geronimo Power that 32 solar panels were shot at the Unbridled Solar ...

A Florida man was arrested after deputies said he shot at two solar panel salesmen on Monday afternoon.

HENDERSON COUNTY, Ky. (WEVV) -- Several solar panels were shot at in Robards, Kentucky. Officials with Geronimo Power spoke at Tuesday's Henderson County Fiscal Court ...

Geronimo Power officials say panels were discovered shot multiple times overnight about a month ago. Officials say there are employees who work at night and are lucky to not have gotten hurt....

A representative of the Unbridled Solar Farm said the company's panels have sustained 32 bullet holes from people shooting at them during an update Tuesday morning to Henderson ...

Solar panel fires don't happen because photovoltaic technology is inherently dangerous - they occur when something goes wrong during installation or over time. Poor workmanship remains ...

The Mississippi County Sheriff's Office is warning residents about shooting solar panels after three incidents in the past year caused thousands of dollars in damage.

James Davies of MiPV shows us how a CIGS solar panel continues to function after being shot five times by a .22 rifle.
