Mingyang, Xuan Thien, and PowerChina sign deal for 6GW energy project cluster, including offshore wind power, green hydrogen and green ammonia, and zero-carbon industrial parks.

PowerChina has announced that an official groundbreaking had taken place for the 1,000MW/6,000MWh battery energy storage facility in Chayouzhong Banner, Ulanqab, Inner Mongolia.

The project is located in Minfeng County, Hotan Prefecture, Xinjiang Uygur Autonomous Region. It involves the planned construction of one 200MW/800MWh lithium iron phosphate (LFP) ...

The three parties will leverage cross-border synergies to invest in and develop an energy project cluster with a total scale of 6 GW, covering three major sectors: offshore wind power, green ...

On June 26, the 1,000 MW / 6,000 MWh power-side energy storage project in Chayou Zhongqi, Ulanqab City, Inner Mongolia officially commenced construction. The project is currently ...

The construction of the world's largest power generation-side electrochemical energy storage project, located in Ulan Chab, Inner Mongolia, officially began on June 26. The project, with a...

On July 5, 2025, the world's largest power-side electrochemical energy storage project undertaken by China Power Construction Corporation - 1 million kW/6 million kWh power-side energy storage ...

Power Construction Corp. of China (PowerChina) has broken ground on what is expected to be the world's largest generation-side electrochemical energy storage project to date.

By aligning technical ambition with national policy, the project demonstrates how EPC firms can scale renewable energy storage at a commercial and environmental scale.

This project is a vital part of Inner Mongolia's integrated "Wind - Power - Hydrogen - Storage" strategy. It

Powerchina energy storage project

will support the Autonomous Region in achieving its goal of attaining more than ...
