Swiss cleantech startup Sun-Ways has signed a collaboration agreement with the SNCF Group to test a new way of producing solar power directly on active railway tracks. The partnership ...

Swiss startup Sun-Ways has switched on a removable solar plant installed on a functioning railroad line in western Switzerland. The array, billed as the world's first track-mounted ...

Swiss solar energy start-up Sun-Ways has teamed up with French state-owned rail operator SNCF to partner in the world's first removable solar power plant installed on an active ...

The Swiss start-up Sun-Ways has inaugurated the world's first removable solar power plant built directly into an operational railway line.

Projects in Germany, Italy, France and Japan are testing solar panels between the rails. However, the Swiss start-up is the first to have designed a removable system that can be placed on...

The world's first solar power plant on a working rail line We're joining forces with Swiss start-up Sun-Ways to explore how movable solar power generation equipment can be installed between ...

Experts say using existing infrastructure like railways avoids taking up open land and helps meet solar goals without disturbing nature. If the Sun-Ways system succeeds, railway lines ...

Switzerland is pioneering the concept of turning its national rail network into a massive, decentralized power plant, and the results could reshape the future of green energy infrastructure. ...

Switzerland has launched what's billed as the world's first removable solar power plant on an active railway. Installed in the relatively unused space between the rails, the solar panels were ...

A Swiss startup has achieved a groundbreaking milestone by launching the world's first photovoltaic solar

Railway Solar Power Plant

plant on railway tracks, promising to revolutionize renewable energy integration in ...
