Midong features 5.26 million 650-W monocrystalline bifacial double-glass photovoltaic (PV) panels. The facility's infrastructure includes more than 1.23 million supporting piles, five 220-kV...

Data and information about Solar power plants and their location plotted on an interactive map of China.

Utility-scale solar power capacity in China reached more than 880 gigawatts (GW) in 2024, according to China's National Energy Administration. China has more utility-scale solar than ...

Renewable energy projects, such as solar power plants, have been built in western regions of China where many native nomadic people have had their land taken away.

Explore China's massive solar megaprojects. Learn how gigawatt-scale photovoltaic farms in remote regions are reshaping the global energy landscape.

China's solar energy production is reaching simply staggering levels, dragging energy costs down around the globe.

China is a solar energy hub that houses a number of the world's largest solar power plants. Over the last few years, China, which is the top emitter of greenhouse gases (GHG), has increased its share of ...

China is using the high-altitude expanse for immense solar panel farms and wind turbines and has begun work on the world's largest hydroelectric dams.

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target....

Data released by China's National Energy Administration last year revealed that the country's solar electricity generation capacity grew by a staggering 55.2 percent in 2023. The ...
