We supply and install solar panels, inverters, and battery storage, so you can reduce reliance on the grid and power your home or business with clean, sustainable energy.

Zip Solar offers trusted NETCC-approved solar systems in Brisbane for homes and businesses. Get a free quote and quote-beat offer for your installation.

Home solar panels are rapidly becoming mainstream. We'll help you decide if a home solar panel system is right for you.

Whether you're installing new solar power systems or upgrading your existing solar panels, our local technicians deliver quality installation and ongoing support.

Solar panels work through the photovoltaic (PV) effect. When sunlight hits the panels, it creates an electric current that is first used to power electrical systems in your home.

Plug-in solar has remained in the shadows because of a lack of safety standards and often costly requirements imposed by utilities, but that's changing.

As a leading solar battery provider in Brisbane, we've completed a range of residential and commercial solar projects. Check out our portfolio to see our work in action.

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV) or indirectly using concentrated solar power.

Discover the hybrid solar system benefits with Energy Matters! Enjoy seamless power with grid and battery backup. Unsure about hybrid solar vs standalone? Explore your best energy solution now!
