Does TECO offer a solar metering program?

The Sun Select program allows any TECO customer to pay a fixed rate for solar energy rather than their usual fuel charge, but participants might never save money in the program. TECO's net metering program is available to people who own or lease solar panels and have them installed on their property.

Does Teco have solar power?

In fact, the company says that solar power made up 14% of its energy mix as of 2023, and the utility has a goal of 60% reduction in carbon emissions by the end of 2025 (compared to 2000), which is very impressive. TECO also offers programs that allow its customers to directly support solar power.

Are TECO's Sun select and net metering programs the same?

TECO's Sun Select and net metering programs are available in 2025. Unfortunately, these programs are not created equally, and the better of the two may be changing soon. Sun Select allows customers to directly support solar energy in TECO territory, but it currently costs people extra on their monthly bills in order to participate.

Does TECO offer net metering?

TECO's net metering program is available to people who own or lease solar panels and have them installed on their property. Out of the two solar programs, going solar with net metering is a much better deal for eligible TECO customers.

TECO's Sun Select 2 shared solar program offers a straightforward way to gain the advantages of renewable energy, even if installing a rooftop system isn't feasible for you.

Solar energy produced at TECO Solar Plants We have 27 large-scale solar plants capturing sunlight. Learn More >
