-----  
What is the cheapest solar panel inverter?

One of the cheapest solar panel inverters available is the ENPHASE IQ7 Microinverter (Model #IQ7-60-2-US). Launched in 2018, this microinverter is priced at approximately \$120. The main reason why the ENPHASE IQ7 is so cost-effective is that this model is installed on each solar panel, handling the output of that specific panel.

Where can I buy a solar inverter?

In the United States, there are several reputable places where customers purchase solar panel inverters for their solar panels, including The Home Depot, SolarEdge, and A1SolarStore. The Home Depot offers a range of solar inverters suitable for various applications such as cabins, RVs, backup power, and residential use.

What is the most expensive solar inverter?

Unsurprisingly, that top-notch technology comes at a price. EnergySage data from the second half of 2024 shows that solar panel systems with this SolarEdge inverter cost \$2.90 per watt (that includes the inverter and solar panels), making the Home Hub the most expensive inverter on our list. 2. Best voltage performance: Tigo EI Inverter TSI-7.6
