LONGi only produces monocrystalline PERC solar panels as they have been focused on producing single crystal (mono) silicon wafers since the early 2000s. Generally their panels have ...

Thanks to the improved RCz process, LONGi Tera silicon wafers can achieve a more uniform axial resistance distribution without having to shorten the ingot length. For the same ingot length, the ...

The release of the "Longi Life Cycle Standard" promotes the high-quality development of the photovoltaic industry. At the same time, the use of Longi standard orders has improved delivery ...

LONGi provides a 12-25-year product warranty and a 25-30-year output warranty. These panels exhibit a lower-than-average annual degradation rate of approximately 0.5-0.35%, and their gallium-doped ...

In semiconductor manufacturing, a wafer is cut into multiple chips, whereas a PV wafer more or less retains its size even as part of the module. Thus, there is a need to evaluate the whole ...

Chinese solar manufacturer Longi unveiled a new PV module with 25.9% efficiency at the 2025 SNEC trade show this week in Shanghai, produced ...

Chinese solar manufacturer Longi unveiled a new PV module with 25.9% efficiency at the 2025 SNEC trade show this week in Shanghai, produced using both low- and high-temperature ...

Thanks to the improved RCz process, Longi Tera silicon wafers can achieve a more uniform axial resistance distribution without having to shorten the ingot length. For the same ingot ...

Backed by advanced technologies, LONGi solar panels feature excellent power ratings and top conversion efficiencies, and can be used across all market segments. LONGi's field-proven bifacial ...

The difference between LONGi silicon wafers and photovoltaic panels

Now a team led by researchers from Chinese vertically integrated module manufacturer Longi has developed processes to fabricate high-efficiency heterojunction (HJT) solar cells, while...

An informative scoop on the Chinese LONGi Solar panel manufacturer's history and the points of difference in using their products.
