Somewhere in the tumult of the global economy in recent months, solar panel prices hit bottom and then began to rise. The oversupply that helped to push prices down last year has eased a...

In order to continue using the current power pricing mechanism, some companies might rush to install PV systems before 1 June 2025, potentially leading to a surge in demand and an ...

(Yicai) Feb. 26 -- Several leading Chinese photovoltaic companies have confirmed to Yicai that they hiked solar module prices after demand for the products recovered.

Wood Mackenzie's October 2025 analysis confirms that PV module prices are jumping approximately 9% in Q4 2025, with further increases expected through 2026. This isn't a temporary blip. It ...

Since the beginning of the second half of 2025, prices have recorded an increase of 4.88%. Forward curve indications tracked the spot market higher.

New solar tariffs in 2025 could drive prices up. Lock in current rates with Solar Wave before costs spike later this year.

Solar panel prices have seen a nearly 5% increase as China's government tightens its regulatory measures on the photovoltaic industry. The Chinese Module Marker for TOPCon modules ...

Energy data and analytics firm Wood Mackenzie believes that solar PV module prices will climb by about 9% in Q4 2025. The rise is driven by polysilicon consolidation, supply cuts, and the ...

As the world's biggest solar energy conference kicks off in Shanghai on Tuesday, the mood is likely to be subdued as Chinese solar panel producers grapple with oversupply and price...

The price of photovoltaic panels will increase after the Chinese New Year

For now, opportunistic price increases linked to new tariffs are being observed, while Chinese producers explore shifting cell production to Africa to bypass restrictions.
