What is a DIY solar panel system?

A DIY solar panel system is exactly what it sounds like: a solar energy system that you design, purchase, and install yourself, rather than hiring a professional solar company.

How do I set up a DIY solar system?

You can easily set up a DIY solar system if you're comfortable with basic construction, running power tools, and electrical wiring. This guide will walk you through every step, from determining how much energy you need to assessing your home's energy generation potential.

How do you build a solar panel?

To build your own solar panel, you'll need to assemble the pieces, connect the cells, build a panel box, wire the panels, seal the box, and then finally mount your completed solar panel. Purchase the cells. There are a few different types of solar cells to buy, and most good options are either made in the United States, China, or Japan.
