-----  
Are battery energy storage systems the UK's future?

The UK's energy landscape is undergoing an unprecedented transformation, with renewables supplying ever-more of our electricity and demand for electricity growing, which means an increased need for flexible storage assets like battery energy storage systems (BESS). But what battery assets does the UK boast currently?

How big is battery energy storage in the UK?

The UK had a total of 4.4GW of battery energy storage system (BESS) capacity as of June 2024. And the sector is braced for further significant growth, with the total capacity of projects in the pipeline rising from 50.3GW to 95.6GW between 2023 and 2024.

Why are battery storage projects important in the UK?

The battery storage projects in the UK are helping the country meet rising energy demands, integrate renewable sources, and move closer to its Clean Power 2030 goals. The UK's battery storage sector continues to grow year after year, backed by a robust pipeline of projects and strong planning activity.

Are battery energy storage revenues increasing in Great Britain?

Battery energy storage revenues in Great Britain reached a rate of  $\pounds 88\text{k}/\text{MW}/\text{year}$  in January 2025, marking a 5% increase from December 2024 and the first back-to-back monthly revenue increase since early 2024. Source: Modo Energy Note: Monthly ME BESS GB revenues since January 2024

With an operational battery storage capacity of 6.8 GW/10.5 GWh, the UK is a leader in the European battery storage sector. The UK's goals are even more ambitious. By 2030, they plan to have a ...

In January 2025, our research focused on evaluating the latest on battery energy storage operations, buildout, and policy updates from the end of 2024 and how these will shape the landscape for ...

Largest UK battery storage projects, including the Thorpe Marsh BESS, Fithie Battery Energy Storage System, Trafford Battery Storage System, Innova Alhhome Energy Hub, Brant Energy Storage, ...

Data published last year by Modo Energy provided an insight into the major suppliers that are dominating the GB market.

# UK energy storage battery exports

But what battery assets does the UK boast currently? How much capacity is under construction and consented, and what has the growth journey of battery storage projects looked like?

Activity in the UK battery energy storage system (BESS) market continues to grow substantially year-on-year despite numerous headwinds, as detailed in this H1 recap from our Market ...

Energy storage systems offer a solution by providing backup power during periods of high demand or supply disruptions. These systems store electricity during times of low demand and discharge it ...

Flexible technologies like batteries will form part of the UK's smarter electricity grid, supporting the integration of more low-carbon power, heat and transport technologies, which it is ...

Its goal is to make the UK a science superpower for batteries by supporting world-class battery facilities and innovative businesses in the battery supply chain.

Until now, European and UK carmakers have been buying batteries from South Korea and China. There are, however, massive opportunities for the UK to step up its battery production ...
