Discover 8 groundbreaking solar and wind energy projects shaping Ukraine's future, boosting clean energy, and leading its green transformation.

Despite wartime risks and constant pressure on the energy system, Ukraine continues to develop a new decentralized, resilient, and modern energy infrastructure. One such project is the construction of a ...

The National Energy and Utilities Regulatory Commission of Ukraine (NEURC) has approved the connection of a 3.8 MW solar plant, integrated with a 6.9 MWh energy storage system, ...

Notus Energy is moving forward with structuring Ukraine's first corporate PPA project, while Goldbeck Solar, a member of the EUEA, with support from the German government, has ...

In October 2025, The Energy Act for Ukraine Foundation installed a solar power station at the Central district hospital of the Izmail district in Ukraine's Odesa region. Just one month after commissioning, ...

In March, DTEK announced it was building Poland's first large electricity storage facility as part of its plan to establish a pan-European energy system connected to Ukraine.

This comprehensive analysis delves into the core drivers, technical solutions, and strategic pathways for deploying resilient solar-plus-storage systems across Ukraine, providing a ...

The UK and Ukraine have launched the InnovateUkraine programme, which will support 13 green energy innovation projects in Ukraine with a & #163;16m investment from the UK government.

Wait, no - that last point actually works in Ukraine's favor. With conventional power plants becoming strategic liabilities, distributed energy storage systems paired with solar offer both resilience and ...

Ukrainian energy storage solar power station

According to Ukraine's National Energy and Climate Plan, approved in June 2024, the country aims for 27% renewable energy in final consumption by 2030. That requires massive new ...
