In June 2024, the U.S. International Trade Commission found that imports of c-Si cells and modules from Vietnam, Malaysia, Thailand, and Cambodia may be harming the U.S. solar panel ...

As sunrise follows night, solar panel exports will continue evolving. The question isn't if they can be exported, but how quickly the industry can adapt to tomorrow's trade realities while powering today's ...

Factories in China, mostly shut out of the U.S. market for over a decade by high import duties, have been boosting solar panel sales to Asia and Africa, data from energy think-tank Ember ...

U.S. consumer demand for renewable energy continues to grow, with more solar panel capacity installed in 2024 than in 2023, which saw more than in 2022. But U.S. trade policy is in flux, ...

Export rebates on PV modules will be fully canceled, while rebates on battery products will be gradually phased out and eliminated by 2027.

Breaking news from Beijing is reshaping the global solar market. On January 9, 2026, China announced it will eliminate VAT export rebates for solar products effective April 1, 2026. This ...

The large gap between US solar module manufacturing capacity and the availability of domestic cells, wafers, ingots and polysilicon is prompting concerns that preliminary US tariffs on ...

While the photovoltaic panel shortage continues to disrupt renewable energy plans globally, adaptation and innovation are lighting the path forward. The question remains: Will 2026 bring relief, or is this ...

U.S. shipments and sales to the original equipment manufacturer (OEM) for resale and export shipments are not published for certain months to protect individual company data.
