Our products are related to every step of mining production. In these years, our annual output and annual sales value all have got the top level in the same industry.

Wireless mining communication networks transport data, voice, and video, supporting applications that are essential to efficient and safe mine operations. The network is typically comprised of both fixed ...

Integrated, scalable and reliable wireless underground mining solutions. From communications and tracking to data analytics, we have your mine covered.

In this paper, we propose a singular value decomposition-based Lagrangian optimization (SVD-LOP) algorithm to minimize the transmit power at the mining base station (MBS) for IRS ...

Basseterre solar container communication station inverter grid-connected solar power generation installation
The whole system is plug-and-play, easy to be transported, installed and maintained.

The container integrates all necessary components for off-grid or grid-tied solar power generation, including solar panels, inverters, charge controllers, battery storage ...

Discover Eaton's wireless mining communication systems designed for harsh environments. Improve safety, connectivity, and operational efficiency in underground and surface mining.

NLT Digital Solutions is at the forefront of underground communications, offering a comprehensive range of products and technologies to enhance safety, efficiency, and productivity in hard rock mining, coal ...

Engineered for 100% reliable connectivity in challenging underground environments, our coal mine communication systems ensure uninterrupted data, voice, and video transmission between surface ...

Wireless solar container communication station inverter for coal mine

Completely wireless and battery-powered mesh network for communications, tracking and real-time awareness of underground operations and working conditions. Use stand-alone or extend coverage ...
