Today, German wooden wind turbine blade manufacturer Voodin Blade Technology has announced the world's first prototype installation of its 19.3-meter wooden wind turbine blades.

Wooden wind turbine blades offer an evolutionary approach to sustainable energy manufacturing. Two leading technology companies are betting on an unexpected solution to one of ...

Engineers are exploring material options for wind turbine towers ...

Imagine a modern wind turbine with blades made of wood, spinning gracefully against the serene backdrop of rolling hills and open skies. This vision is now a reality thanks to Voodin ...

German wind turbine blade maker Voodin Blade Technology (Voodin) has announced the first-ever real installation of its wood-based blades on a wind turbine in Breuna, Germany. These 63 ...

Designed to be fully biodegradable and sourced from sustainable forestry, the wooden blades generate 78% fewer CO2 emissions during production and cost 28% less than metal ...

Engineers are exploring material options for wind turbine towers and blades. Modvion, a Swedish startup, has just launched the tallest wooden wind turbine in the world, and they are ...

The world's first wooden wind turbine blades have been installed in Germany, promising to produce 78% fewer CO2 emissions during construction and reduce production costs by 20% ...

Smart manufacturing processes elevate wood to a top choice. It's the preferred choice for structural applications and the ideal solution when you're looking for strength, dimensional stability and high ...

Voodin Blade Technology is a German company based near Kassel. The start-up has taken on something unusual: It manufactures rotor blades from wood. These are now being tested ...

Wooden wind turbine blade production

This study evaluates the environmental sustainability of wooden wind turbine blades and towers in comparison to conventional materials, focusing on lifecycle CO2 emissions, production ...
